## Amblyopia - Does LASIK have any effect on the Lazy Eye?

Often the treatment for Amblyopia includes occlusion therapy and eye exercises: A patch is worn over the good eye in an effort to force the Amblyopic Eye (often termed the "Lazy Eye") to focus correctly.

There are ophthalmologists who do not recommend LASIK procedures for patients with Amblyopia.

And many do not recommend LASIK Eye Surgery for children under eighteen years of age.

At the 2006 Eye Advance Congress in Mumbai, Dr Cyres K Mehta advised that some patients with Corneal Amblyopia (which he terms "Corblyopia") may benefit from corneal wavefront guided LASIK.

"We have performed corneal wavefront LASIK on patients as young as eight years with spectacular results," Dr Cyres K Mehta advised.
